

Apollo is Go!

(Chorus 1 sing everything in **BOLD**)

Final preparations for the launch are reaching
fever pitch

Apollo is go...Apollo is go!

Checking data making sure it goes ahead without
a hitch

Apollo, Apollo, Apollo, Apollo is go!

Flight Director's anxious face watches everyone in
their places

Men with their shoulders hunched as they sit and
number crunch

Working to allay the fears of scientists and
engineers

Apollo is go...Apollo...

Zero hour; all await the rocket's fury and its
violence

Engines fire; for a fleeting moment all is calm and
silence

Then with a sudden power up it goes and clears
the tower

On and on up through the cloud; engines
unbelievably loud

Apollo is go...Apollo is go!

Apollo, Apollo, Apollo.....

The astronauts are in the hand of Fate as they're
held in their places

Shaking and shuddering, tension clearly shows on
their faces

Up through the cumulus, fluffy, white,
voluminous

In seconds flat they're higher still through the
cirrus-icy chill
