

## System Overload

(Chorus 1 sing everything in **BOLD**)

**Alarm bells ring! System overload just metres from the surface**

**Lights flash! Danger Red Alert! Navigation system overload.**

Three days out and a quarter of a million miles away

No suggestion of a problem

Not a murmur, not a murmur.

Final descent just moments away

Suddenly the system fails.

**Alarm bells ring! System overload just metres from the surface**

**Lights flash! Danger Red Alert! Navigation system overload.**

Decision time; A choice to be made in a matter of seconds

Decision time; Do you risk it all or is it time to abort?

**Alarm bells ring! System overload just metres from the surface**

**Lights flash! Danger Red Alert! Navigation system overload.**

Decision made; over-ride the system

Decision made; Pray to God it's the right choice to take.

**Alarm bells ring! System overload just metres from the surface**

**Take control, down she goes; dust rising from the surface**

Dust rising from the surface...
